

A simple Todo List app is a lightweight tool for managing everyday tasks in Creatio. It allows users to create and maintain a list of tasks, see them in a structured list view, update their status, and manage task details throughout their lifecycle.

Typical features include:

- Create tasks with a short title/description
- View tasks in a list (e.g., a section/list page)
- Update status (e.g., "New" / "In progress" / "Completed") via a field or checkbox-style control
- Edit task details (update the title/description and other fields)
- Delete tasks when they're no longer needed
- Filter tasks using standard list filters (e.g., All / Active / Completed)
- Assign user
